

# HALOTRONIX ELECTRONIC TRANSFORMERS BY MELCON

Now available in 150 Watt!

Electronic Transformer series:

## HALOTRONIX

The HALOTRONIX transformer series model ET50, ET105, and ET150 are designed for general-purpose residential, commercial installations.

The HALOTRONIX series offers Very high reliability at competitive cost.

## Applications

Typical areas of application in residential or domestic situations include living rooms, kitchens, bedrooms, halls, offices, recessed down lights, and building into luminaries. Due to its separated input and output terminals, the secondary output offers 3 independent terminal blocks, suitable for 2,5mm<sup>2</sup> stranded wire with metal ferrules. In spite of its low cost, all HALOTRONIX transformers offer additionally excellent Immunity, with a much higher Surge withstanding capability as the mandatory values of EN 61547. This results in an improved reliability, even in worst-case domestic & commercial installations.

## MELUX ISO 9001 Quality standard

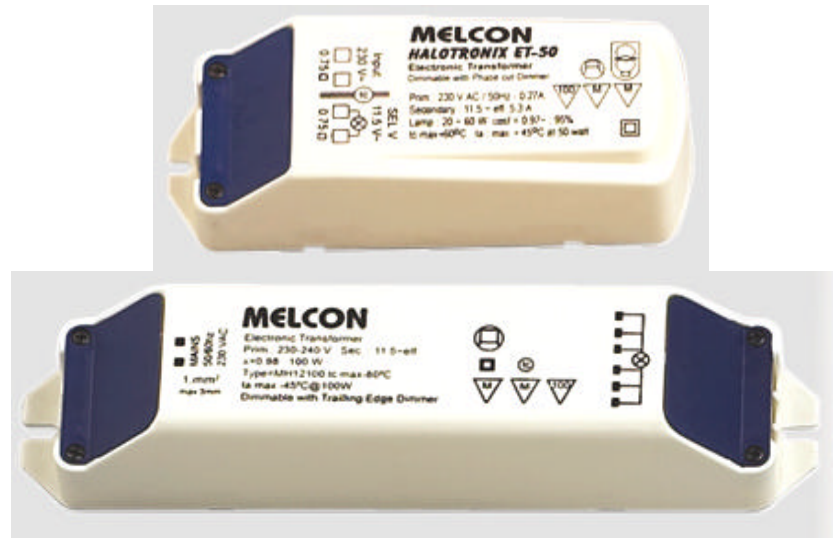

As a leading manufacturer of electronic control gear for Low Voltage Halogen lamps, MELUX ensures that from the earliest development stage optimum performance, reliability and a long service lifetime are standard properties for every manufactured electronic transformer.

## International Standards Compliances

HALOTRONIX electronic transformers comply with all relevant mandatory international regulations, in particular with the following standards:

- RFI < 30MHz: EN 55015,
- Harmonics: EN 61000-3-2
- Immunity: EN 61547
- Safety: EN 61046:94 A1: 96
- Performance: EN 61047:92 A1: 96 (Quality Standard)

Measurements L x W x H 142x36x28
